

## Flat or Curved-Face Doorway and Service Panel/Woodbox Extensions

These extensions facilitate smooth and proper connection of the oven to a facade wall. The side walls of the extensions flare out slightly to enhance user accessibility and customer visibility. The extensions are available in stainless or mild steel (painted black), with or without a black granite mantle. NOTE: Addition of granite increases dimensions F and G by 0.75-inches (below the doorway). The curved-face extensions are available in large or small radius styles. Contact Wood Stone for more detailed drawings and installation information.
