INSTALLATION AND OPERATION MANUAL FOR THE WOOD STONE OKANOAGAN ROTISSERIE

STONE-FIRED COOKING EQUIPMENT OKANOAGAN SINGLE SPIT ROTISSERIE WS-SSR-(45, 57)

ADDITIONAL COPIES AVAILABLE UPON REQUEST

Wood Stone's Okanogan Rotisserie has been tested and approved by Intertek Testing Services, and is ETL Listed to ANSI / UL-197 CSA 22.2 and to NSF/ANSI Standard 4 - 2007.

To install the Okanogan Rotisserie drive on a Wood Stone Charbroiler (if ordered together), simply place the unit on the rails that are at the top of the Charbroiler and plug it in. Make sure that the unit glides smoothly on the rails, that the power switch is facing the operator and that the cord and plug are not restricted or in danger of getting too hot.

To install the Okanogan Rotisserie drive as an addition to a previously installed Wood Stone Charbroiler, the rail/support assembly must first be installed. To do so, place the rail assembly on the Charbroiler. The rail/support assembly should seat inside the walls of the Charbroiler; make sure the assembly is positioned as far back as it will go. Drill through the walls of the Charbroiler as indicated by the holes in the rail assembly. Secure the assembly to the Charbroiler using the carriage bolts provided. For the rest of the installation process, refer to the previous paragraph.

- ALWAYS TURN OFF THE MOTOR WHEN LOADING OR UNLOADING THE ROTISSERIE.
- PULL THE OKANOAGAN TOWARD THE FRONT OF THE GRILL TO LOAD AND UNLOAD SPITS.
- USE HOT PADS OR OVEN MITTENS WHEN UNLOADING A SPIT, IT MAY BE VERY HOT!
- ONCE THE SPIT IS SECURELY IN PLACE, PUSH THE ROTISSERIE TOWARD THE BACK OF THE GRILL AND TURN THE MOTOR BACK ON.

The spits can only be inserted into the rotisserie drive one way. You will notice that all the spits have one pointed end and one square end. The rotisserie drive has one round hole and one square hole (the square hole will always be on the same side as the rotisserie motor). Insert the pointed end of the spit into the round hole (1) and then back the other end of the spit into the square hole (2). Make sure that the pointed end of the spit is backed out of its hole far enough to allow the spit to turn freely (3).
