## BISTRO 4343 CE

Radiant Flame Gas-Fired Oven

<b>Job Name</b>	
<b>Model</b>	WS-BL-4343-RFG-CE
<b>Item#</b>	
<b>Fuel Type</b>	<b>Gas-Fired</b>

The Bistro 4343 features a standard door opening 620 mm wide x 250 mm high. The cooking surface is 865 mm wide, and 686 mm deep, resulting in 0.59 square meters of usable deck space.

The dense, high temperature ceramic formulation of which the 205 Kg, monolithic, cast-ceramic floor and the 260 Kg, monolithic dome are cast creates a "deep heat sink" within the chamber of the oven. The hearth and dome are connected by a carefully tensioned steel exoskeleton, which ensures structural integrity and long life. The front, sides and back of the oven are enclosed with stainless steel. The oven sits on a heavy-duty, black stand which acts as a support frame. A stainless steel storage compartment is optional and can be provided in the support frame.

The ceramic interior is heated by a powerful, adjustable radiant burner located in the back of the oven chamber. The burner is controlled exclusively by the chef. The heat distribution in the oven can be adjusted to meet the needs of a variety of menu items. The Bistro can be configured to burn either Natural Gas (methane) or Propane - gas type should be specified at time of order.

For ease of installation, the oven may be disassembled to fit through 760 mm openings.

The Bistro must be vented as a Type A or Type B<sub>11</sub> appliance, and in accordance with all applicable codes.
